POLYFIRE

Fire Protection for Marine Applications.

Polyfire is a specialized sandwich panel designed to provide maximum fire safety on board vessels. Its B15 certification makes it compliant with the stringent international regulations for the marine industry, such as IMO SOLAS MED.

WHY CHOOSE POLYFIRE?

- **Calcium silicate core:** Guarantees excellent fire resistance, classified B15.
- **Durable and resistant:** Resistant to humidity and atmospheric agents.
- **Sustainable:** Produced with low-formaldehyde adhesives and the possibility of FSC certification, it is the ideal choice for those who want a sustainable and high-quality product.
- **Acoustic insulation:** Significantly reduces noise propagation.
- **Versatility:** Available in various thicknesses and densities to suit different needs.

APPLICATIONS:

- Compartmentation
- Ceilings
- Flooring

Polyfire is the ultimate fireproof panel, specifically designed for the marine industry. Thanks to its unique characteristics, it is the perfect solution for those who want a safe, comfortable, and environmentally friendly boat.
